New Freshmen (FTIACs), Fall 2008

In Fall 1996, Institutional Research changed its method of counting new freshmen (FTIACs). For consistency with the U.S. Department of Education's Integrated Postsecondary Education Data System (IPEDS) definition, Institutional Research now includes students who entered CMU in the summer as well as students who had previously taken courses at CMU while in high school. These students had not been previously counted as new freshmen.

By the older method of counting FTIACs, there were 3,360 first time freshmen at CMU this fall. An additional 504 students were counted as FTIACs due to the change in procedure. On most reports, the Fall 2008 FTIAC number is given as 3,864. However, on some historical reports, in order to preserve data consistency, the older method resulting in a number of 3,360 has been used.

NOTE: The number of new freshmen starting during the summer of 2008 is much higher than normal due to students enrolling early in order to take advantage of The CMU Promise, a guaranteed tuition plan that was no longer being offered beginning Fall 2008.

***Maintain a steady new freshman class size of 3,700.

NOTE:

These freshmen enrollment numbers do not include students who matriculated in summer, nor do they include students who originally began attending CMU while in high school. Therefore, the freshmen numbers provided here do not include 70-100 freshmen that are included in the IPEDS definition of FTIAC. Starting Fall 2007, the CMU fall new freshmen enrollment includes summer cohorts.
